Installation Notes

◆ Wall panel installation

Method 1
Directly insert the stainless steel fastener into the bottom of the wall panel and fix it on the rough wall. This method is suitable for walls with a flat wall.

Method 2
The wall is leveled with the keel, and the stainless steel fasteners are fixed on the wooden keel with self-tapping screws. This method is installed and the plate can be removed reuse.

Method 3
The wall is leveled and fixed with wooden keel, and the bottom edge is directly fixed to the wooden keel with a row of nails. This method is quick and easy.

◆ Accessories installation

Top corner installation
Snap the top line card slot into the edge of the ceiling

Decoration line installation
Fix the line of the card slot on the surface of the wallboard with a row of nails and insert the wire frame horizontally

Skirting installation
Fix the line of the card slot on the surface of the wallboard with a row of nails, and insert the skirting line horizontally
